

	Environmental Policy Statement	Reference:	ARA/POL/HSQE/003
		Issue Date:	February 2024
		Issue:	06
		Next Review Date:	February 2025

Advanced Rope Access (ARA) has developed and implemented an environmental management system registered to standard ISO14001:2015 through a UKAS accredited body and is focussed on continual improvement, is committed to the prevention of pollution and compliance with current applicable environmental legislation.

Particular emphasis is given to significant environmental aspects such as fuel usage, waste, the protection of wildlife and habitats and the protection of controlled waters. We endeavour to manage the environmental aspects and impacts of our activities and reduce, as far as reasonably practicable, the effects of noise, dust, disturbance and inconvenience to others.

We continually strive to improve standards throughout our areas of operations by enhancing environmental awareness and commitment amongst our employees through structured training, and encouraging the adoption of sound environmental principles amongst our contractors and customers alike.

We will set Specific, Measurable, Achievable, Realistic and Timebound (SMART) objectives and measure progress through Key Performance Indicators.

As Managing Director I have overall responsibility for environmental issues and shall ensure that our policy is communicated to all employees, contractors, the public on request, and any other interested third parties.

This policy will be communicated to all employees on initial induction and following policy changes, be communicated to our suppliers as necessary and other interested parties and be reviewed regularly and annually as a minimum.

Lyle Robertson
Managing Director
